README.md

I'm a Problem Solver. That statement can easily be validated by the numerous projects I've created from the ground up. Every project was developed because of a problem I had experienced myself. I've taken them from an idea, all the way to a minimum viable product and talking to investors. Throughout these endeavors I've learned how to efficiently identify a problem, produce a solution based on meaningful metrics, analytics, and A/B tests, market and sell the product, then scale to a larger audience. I want to put my extraordinary skill-sets to good use at your company and work with a team of your best innovators. Please don't hesitate to contact me if you have any questions. Thank you!

Experience

ExaCare - Founding Software Engineer

Built the frontend from the ground up based on Figma designs

Mar 2022 - Dec 2022

Futon Media - Creator

Instantly stream Movies and TV Shows via Emby Media

Sep 2018 - Feb 2022
