📄 README.md

I'm a Problem Solver. That statement can easily be validated by the numerous projects I've created from the ground up. Every project was developed because of a problem I had experienced myself. I've taken them from an idea, all the way to a minimum viable product and talking to investors. Throughout these endeavors I've learned how to efficiently identify a problem, produce a solution based on meaningful metrics, analytics, and A/B tests, market and sell the product, then scale to a larger audience. I want to put my extraordinary skill-sets to good use at your company and work with a team of your best innovators. Please don't hesitate to contact me if you have any questions. Thank you!

🪄 Experience

CrowdPass - Lead Software Engineer
Jan 2023 – Current
Designed and built the frontend, backend, and mobile app for an RFID+NFC wristband entry access system, then deployed to events hosted by Lamborghini, Ecolab, and Palm Springs Surf Club

ExaCare - Founding Frontend Software Engineer
May 2022 – Dec 2022
Built the entire frontend from the ground up, precisely following a Figma design

Futon Media - Creator
Sep 2018 – Feb 2022
Instantly stream Movies and TV Shows via Emby Media

LeverEdge - Lead Software Engineer
Feb 2020 – Apr 2020
Upgraded frontend to use Nuxt.js, created a LinkedIn scraper with headless Puppeteer

DocHub - Lead Software Engineer
May 2019 – Oct 2019
Scaled product, integrated analytics/metrics, upgraded frontend to use TypeScript

Kava Labs - Senior Full-Stack Software Engineer
Sep 2018 – Apr 2019
Designed, developed, and deployed customer-facing 'Kava Switch' blockchain platform

Robinhood Tools - Creator
Dec 2016 – Aug 2018
Advanced tools and resources for trading equities on Robinhood

GetHuman - Senior Full-Stack Software Engineer
Sep 2016 – Aug 2017
Designed, developed, and deployed native mobile platform on iOS & Android using NativeScript

EMC Corporation - Full-Stack Software Engineer
Sep 2015 – Dec 2015
Helped develop scanner reporting front-end in an agile environment using scrum methodologies

📖 Education

Google Primer - Grow With Google Program
Insights from trusted industry experts insights from trusted industry experts into jargon-free interactive lessons featuring practical next steps for reaching your business or career goals

University of Rhode Island - Computer Science
Sep 2009 – June 2010
Voluntarily resigned due to outdated curriculum
